Prospective Employers

To Whom It May Concern:

This letter serves as my formal recommendation of Troy Garcia. From 1995 to 2006, Troy and I worked together to establish and implement datacenter opportunities for client expansion in our outsourcing line of business. Troy led the regional team in the implementation of data center operational best practices and strategies which ultimately increased CSC's revenue growth.

During his time with CSC, Troy consistently demonstrated a strong work ethic and a dedication to success. His efforts produced quality results time and time again as he worked in the capacity of a regional senior technical team lead and local data center manager. These roles were a major responsibility within CSC and the western region and required a great deal of thought and effort on Troy's behalf.

Troy was in an official leadership role contributing to CSC's regional and global data center efforts and many of his peers routinely sought his advice and support. Troy consistently demonstrated his ability in this role and was always eager to share his knowledge and experience with the global data center management team.

For these reasons, it is without reservation that I recommend Troy Garcia to any organization seeking a positive contributor possessing these capabilities.

Sincerely,

Mikel P. Nunnally
